EVER BUILD
CUT & BEND FACTORY

A Message from the Managing Director

Since the establishment of **EVER BUILD** in the Kingdom of Bahrain in 2011, we have remained committed to a clear vision to be a trusted partner in the nation's construction and development by providing high-quality building materials and reliable services tailored to the local market.

We are proud to have supplied hundreds of projects, including residential, commercial, and infrastructural, that contribute to the growth of this beloved kingdom.

As part of our continued journey, we are pleased to announce the launch of our brand new rebar cutting and bending factory, which is a significant step towards the company's vertical integration and enhanced production capabilities.

At **EVER BUILD**, we pledge to keep innovating, expanding, and delivering integrated solutions that meet the aspirations of our partners across Bahrain and beyond.

With sincere appreciation,

Maher Abbas
Founder & Managing Director

Cut and Bend Factory

We offer our valued customers and prospective clients a new line of comprehensive range of cut and bend solutions for your entire line of reinforcement steel

CUT & BEND FACTORY

Being a reliable and dynamic trading company in the Kingdom of Bahrain with a successful track record of over 15 years of extensive experience in sourcing, distributing and supply of high-quality products in trading and construction industry, we now have entered into manufacturing sector as a part of our strategic business growth and expansion plan for increasing our market share and cater the ever-growing demands for the customized products and services in construction industry.

Our brand new fully automated cut and bend facility imported from well-known European suppliers having decades of experience with state-of-the-art technology can produce from 8 mm to 50 mm cut and bend products according to BS and ASTM standards from straight rebars and rebars in coils ensuring precision, efficiency and reduced wastage.

We offer our valued customers and prospective clients a new line of comprehensive range of cut and bend solutions for your entire line of reinforcement steel products requirements such as cut and

bend rebars, couplers, pre-fabricated cages, steel fixing at site, welded wire mesh, rebar detailing and shop drawings etc. All of our equipment for cutting and bending conforms to international standards, ASTM, ACI-316, BS-4466, BS-8666 to cut down steel wastage and delivery time which enables production of steel products with higher dimensional precision.

With this addition, our company aims to streamline the reinforcement process for our clients, enhance on-site productivity and uphold the highest standards of quality and safety. The facility is operated by a highly qualified and skilled workforce and follows strict quality control protocols to meet diverse project requirements across residential, commercial and infrastructure sectors. We believe that this initiative not only strengthens our service offerings but also positions us a comprehensive solution provider in the kingdom. We always aim to build long term partnerships with our customers and suppliers based on trust, integrity and mutual growth. Our expertise lies in streamlining the procurement process, ensuring timely delivery and maintaining highest standards of quality and service.
